EDUCATION

- University of Central Punjab, Lahore | Bachelor of Computer Science | **CGPA: 3.84** Third Year Student (2026)

SKILLS

- | | | |
|----------|---------------------|------------------------|
| • C++ | • JavaScript | • Time Management |
| • React | • Data Structures | • Teaching Skills |
| • Python | • OOP | • Leadership Skills |
| • HTML5 | • Assembly Language | • Communication Skills |
| • CSS | • Problem Solving | • Artistic Skills |

PROJECTS

AI/ML Projects

AI-Based Weather Prediction System Using Poisson Regression (AI/ML Project)

Technologies: Python, Flask, Scikit-learn, Pandas, HTML, CSS

- Developed a Flask web application for weather prediction using a **Poisson Regression** machine learning model.
- Performed data preprocessing, model training, and integrated predictions into a responsive web interface.

Python-Based E-Commerce Product Data Scraper with Selenium, Multithreading & SQLite (AI Project)

Technologies: Python, Selenium, BeautifulSoup, SQLite, Multithreading

- Built a multithreaded web scraper to extract e-commerce product (Olx.com) data using Selenium.
- Stored scraped data in SQLite and implemented logging and exception handling for reliable automation.

Pakistan Real Estate Market Analyzer (AI Project)

Technologies: Python, Selenium, Pandas, SciPy, SQLite, Matplotlib

- Developed a real estate analytics system to scrape, clean, analyze, and visualize property listings from Zameen.com.
- Applied statistical analysis and stored processed data in SQLite for reporting and market insights.

Web Development Projects

Personal Portfolio Website

- Created a personal portfolio showcasing my skills, projects, and interests
- Used clean design principles to highlight my work and contact information.

Ice Cream Parlor Website

- Designed and developed a themed front-end website using HTML, CSS, and JavaScript.
- Focused on creative UI/UX design, layout responsiveness, and user interaction.

Cards Matching Game

- Developed a Web based game using HTML, CSS and JS.

Responsive Dashboard Layout

- Built a modern dashboard with Flexbox and Grid, fully responsive for desktop and mobile screens using HTML, CSS, and JavaScript.

Responsive Fitness Training Website

- Designed and developed a fitness training website, fully responsive for mobile and desktop devices with an engaging and user-friendly layout using HTML, CSS, and JavaScript.

Responsive Luxury Jewelry E-Commerce Website

- Designed and developed an e-commerce website, fully responsive with CSS grid, flexbox, and smooth animations and developed video backgrounds with fallback images for performance using HTML5, CSS3, and JavaScript.

Smart & Interactive Calculators

1. Basic Arithmetic Calculator:

Built a sleek, responsive calculator that performs essential operations i.e., addition, subtraction, multiplication, and division with accuracy and a clean, intuitive interface.

2. BMI Calculator:

Built an engaging web tool that calculates Body Mass Index (BMI) based on user inputs for height and weight, helping users quickly assess their fitness levels.

3. Temperature Converter:

Built a handy converter that instantly transforms Celsius to Fahrenheit, featuring a smooth, responsive design for both desktop and mobile users.

C++ Projects

- **Student Management System** (ITC Project)
Developed a console-based system to manage student records, including adding, updating, searching, and deleting data using file handling for persistent storage.
- **Ice Cream Parlor Management System** (PF Project)
Designed an interactive system to handle order placement, billing, and inventory management with menu-driven functionality.
- **Medical Expert Diagnostic System** (OOP project)
Created an expert system using Object-Oriented Programming concepts (inheritance, polymorphism, classes) to provide basic medical diagnostic suggestions based on symptoms entered by the user.
- **Candy Crush Game** (DSA project)
Implemented a console based candy crush game with board representation using 2D arrays, input validation, and colorful displays.
Added an AI module to predict the best possible move and give hints to the user.
- **Hit or Fail Game** (Basic game logic)
Built a simple logic-based game to determine pass/fail outcomes based on user input and conditional statements.

WORK EXPERIENCE

- **UI/UX Designer | Vixels.dev, Lahore** *Present (Part time)*
Designing user-centered web and mobile interfaces to improve usability and user experience. Creating wireframes, prototypes, and high-fidelity UI designs. Collaborating with developers and stakeholders to deliver responsive, accessible design solutions. Conducting user research and usability testing to guide design improvements – Figma.
- **Frontend Development Internship | DevXcript, Lahore** *Aug'24 (1 Month)*
Completed a structured training and mentorship program in web development, combining learning, hands-on practice, and project work. Gained real-world experience in building responsive web pages, improving UI functionality, and creating a portfolio of projects – Html, CSS, JS.
- **Frontend Development Internship | Apexify Technology, Lahore** *Aug'24(1 Month)*
Completed an internship in web development, combining learning, hands-on practice, and project work. Gained real-world experience in building responsive web pages, improving UI functionality, and creating a portfolio of projects – Html, CSS, JS.
- **Game Development Trainee | Pakistan Games Collective (PGC)** *Aug'01 – Sep'30*
Participated in the Summer Learning Program focused on game development fundamentals and gaining hands-on experience with game design, development tools, and industry practices – Unity, Unreal, Blender, Godot.
- **UI/UX Design Trainee | Association for Computing Machinery (ACM-UCP)** *Aug'29 – Sep'26 (6 weeks)*
Undergoing structured training in UI/UX design, focusing on user research, wireframing, prototyping, and interface design principles. Developing skills to design intuitive and user-centered digital experiences using modern design tools – Figma.
- **Teacher | The Islamic Academy, Lahore** *Mar'23 – Feb'24*
Taught 9th and 10th grade students with a focus on Physics and English, created lesson plans, simplified complex topics, and improved overall academic performance through effective teaching strategies and student engagement.

CERTIFICATES AND LICENSES

Supervised Machine Learning: Regression & Classification - DeepLearning.AI via [Coursera](#)

- Covering supervised learning: Introduction to ML, regression with multiple input variables and classification step by step with practical assignments and quizzes.

NVIDIA Fundamentals of Machine Learning - Whizlabs, via [Coursera](#)

- Learned core machine learning concepts, model development workflow, data preprocessing, model evaluation, and practical AI fundamentals.

ACHIEVEMENTS

- **3rd Position in UI/UX Designing, Scale up 2.0 program, UCP**
Secured 3rd spot among students who had participated in Scale Up 2.0 Program organized by ACM UCP in UI/UX designing.
- **Merit-Based Scholarship, UCP**
Awarded a 100% Merit-Based Scholarship at the University of Central Punjab (UCP) for outstanding academic performance.
- **National Outreach Program (NOP), LUMS**
Selected for the LUMS National Outreach Program (NOP) after securing 100% marks in Matriculation.

LEADERSHIP ACTIVITIES

Co-director of Communication at Skills Hive Society, University of Central Punjab

Present

- Guiding and mentoring children from underprivileged communities in creative skill-building.
- Teaching innovative ways to reuse plastic materials to create marketable products.
- Supporting children in developing income-generating activities to help sustain their families.

Takkra Event Organizer 2026, University of Central Punjab

2026

- In collaboration with Takkra UCP Skills Hive Club organized an event code master, a Web Hackathon
- helping students all over institutes to gain skills to solve real world web problems.
- Did marketing of it at different campuses of Punjab Group of Colleges(PGC).
- Registering students to spot their seats.

EXTRACURRICULAR/COMPETITIONS

• Build with Gemma Hackathon 2026 - GDG Platform

Participating in the Build with Gemma Hackathon this July. I will have a privilege to learn, explore AI and solve real world problems and learn from like minded individuals.

• AI Seekho Workshop - GDG Platform

Attending a remarkable workshop on AI Seekho. It will include:

Keynote Sessions - Hear insights from **Googler's**, Google Developer Experts (GDEs), Cloud Architects, and industry leaders.

Cloud & AI Workshops - Hands-on labs to elevate your technical skills.

Tech Demos & Exhibits - Explore cutting-edge tools and solutions.

Networking Lounges - Connect with fellow developers, engineers, and tech influencers.

Swags, Giveaways & More! - Celebrate community learning with fun and rewards.

• IEEE BULC Tech Competition

(2025)

Showcased technical problem-solving and teamwork skills by participating in innovative challenges organized by IEEE BULC.

• Code Rumble Competition - LUMS

(2025)

Competed in a coding competition at LUMS, applying programming and logical thinking to solve real-time coding problems.

• Self-Defense Training

Completed structured training sessions focused on personal safety, discipline, and confidence building.

• Civic Engagement & Cultural Presentations

Participated in community-focused presentations on cultural diversity, civic responsibility, and social awareness.

• Badminton player

Actively engaged in sports, developing teamwork, focus, and strategic thinking through regular badminton practice and competition.
